

BOTTLE TRAPS CLEANING & CARE

INTRODUCTION

This guide outlines the recommended methods for cleaning and caring for your Lusso piece, ensuring it retains its beauty and performance over time. Thoughtful care will preserve the integrity of the materials and allow you to enjoy your product for many years to come.

In the unlikely event that a product does not perform as intended despite correct care and maintenance, Lusso offers guarantees across our collections, with durations tailored to each product. Full details of our guarantees can be found [here](#).

GENERAL ADVICE

- Clean regularly using a soft, or microfibre cloth with warm, soapy water.
- Please avoid the use of harsh chemicals, which may compromise the integrity of the plastic and metal components.
- For the metal bottle traps avoid abrasive materials or scouring pads, as these may scratch the surface.
- To remove limescale use a soft toothbrush to target affected areas.
- Dry thoroughly and wipe away excess water after use to reduce the risk of marks or corrosion.

IMPORTANT INFORMATION

To maintain optimal performance and longevity, we recommend a thorough cleaning of the bottle trap every 2-3 months. If drainage slows, inspect the trap for clogs before considering any other measures.

TO CLEAN THE BOTTLE TRAP IN THE EVENT OF A BLOCKAGE

- Position a bucket beneath the trap to collect any water or debris.
- Carefully unscrew the lower “bottle” section of the trap clockwise.
- Remove any debris or obstruction from the interior.
- Rinse the bottle section thoroughly with clean water.
- Inspect the rubber seals for any signs of wear or damage.
- Replace them if necessary to ensure a perfect seal.
- Reassemble the trap, tightening securely to maintain a flawless fit.
- After cleaning, gently wipe the trap dry to prevent residue buildup.
