CONCRETE

GUIDE

CONCRETE GUIDE

ABOUT CONCRETE

Renowned for its durability and timeless appeal, concrete is a distinguished choice for luxury spas and high-end hotel bathrooms. Our Colore Collection is crafted from fair-faced aggregate concrete which contains elements of naturally sourced materials such as stone and sand. This gives each concrete design a unique texture and characteristics including surface pitting, lines, and exposed aggregates. Concrete is an environmentally conscious option, formed with natural raw materials. Effortlessly maintainable and easy to clean, it complements a variety of bathroom styles.

WHAT TO EXPECT WITH CONCRETE

WILL THE PRODUCT I RECEIVE BE IDENTICAL TO THE IMAGE SHOWN?

Due to the unique characteristics and texture that naturally occur when fair faced concrete is made with stone and sand, each piece of concrete will vary in surface pitting, lines, exposed aggregates and colour. Please consider this when looking at the representative images of our Colore Collection.

WHAT TEXTURE CAN I EXPECT FROM CONCRETE?

Concrete's distinctive characteristics are a hallmark of its natural beauty. During the casting process, small air pockets, known as bug holes, can form on the surface, creating subtle variations that enhance its organic character. Surface pitting and delicate lines may also appear, reflecting the handcrafted nature of each concrete product. Made from a refined blend of aggregates, sand and stone, our concrete designs often reveal glimpses of these raw materials, adding to their unique appeal. These natural variations means that no concrete product will be identical.

WILL MY CONCRETE PRODUCT BE AN EXACT COLOUR MATCH TO THE IMAGE SHOWN?

While our concrete products feature a coloured finish, concrete is never a monotone, block colour due to the variety of materials used in its composition. The natural variations in tone and texture contribute to a unique patina which means each concrete design may vary slightly in colour.

HOW DURABLE IS CONCRETE?

Our concrete products are expertly nano sealed to provide powerful protection against elements penetrating the concrete surface, creating more resistance to stains and cracks. However, you must follow the correct aftercare, as subtle scratches may appear, but can be repaired. As a resilient material, concrete is designed to last for years to come which is why our products are covered by a 25 year guarantee.
