Next, move the wall posts aside, drill the holes using an 8mm drill bit, then use a rubber mallet to lightly tap the wall plugs into the holes until they are flush with the wall. Position the wall posts over the wall plugs, and secure into place using the provided screws.
- 3 Sit the glass profile post in place, as shown in figure 3.
- 4 Install the fixed panel glass and the middle posts, as shown in figure 4.
- 5 Sit the top track in place.
- 6 Lift the top track up, and fix the pivot door into place.
- 7 Adjust the position of the pivot door, then secure it into position using the provided screws, referring to figures 7 and 8 for guidance.
- 8 Install the handle on the glass door, secure the frame with the provided screws, and fit the screw covers.
- 9 Reinforce the bottom track with clear silicone to complete the installation. Please note that the silicone must be completely dry before coming into contact with water, therefore we advise that you wait 24 hours after installation before using the shower and screen.
